**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1,3, 6-8, 10, 12, and 22-26, drawn to an apparatus and method of estimating a lifetime of a cutter comprising a current detector, classified in class 83 subclass 72.
  - II. Claims 4, 5, and 11, drawn to an apparatus and method of estimating a lifetime of a cutter comprising a time detector, classified in class 83, subclass 76.7.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, current detector, of group I, could be employed without the time detector, in group II, and conversely, the time detector could be employed without the current detector of group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

***Conclusion***
